## **Network installation flixo**

## 1. Install server software

Install the latest version of CodeMeterRuntime on the license server: <a href="http://flixo-downloadcenter.ch/CodeMeterRuntime.exe">http://flixo-downloadcenter.ch/CodeMeterRuntime.exe</a>

## 2. Server configuration

Connect the usb-stick containing the copy protection key to the server and launch "CodeMeter WebAdmin" either by entering the address "localhost:22350" into the address line of a browser, or by clicking the "WebAdmin"-Button in "CodeMeter Control Center". Activate the "Network Server" option (Navigation: Configuration\Server\Server-Access) in the configurations and, if required, the "CmWAN Server" option and klick on the "Apply"-button:

		C		
Container ~ License Mon	itoring ~ Diagnosis ~	Configuration ~ Info		*
Configuration Server Access			Ø	📑 English (US) 💙
er Access License Access P	ermissions			
vork Server				
sable				
able				
letwork Port *: 2235	50			
VAN Server				
sable				
able				
mWAN Port *· 2234	1			

## 3. Clients

info<sup>mind</sup>

Install the clients according to the installation guide that comes with the software.

On large networks you have to define the IP-address of the license server explicitly on each client. Launch the "CodeMeter WebAdmin" on the clients and add the IP-address of the server to the "Server Search List" in the configurations and click on the "Apply"-button:

SYSTEMS	CodeMeter WebAdmin						C
